RE: Native American Heritage Commission Notification Letter
Baldwin Energy Facility No. 1

Dear Mr. Wood,

La Jolla Energy Development and Stocker Resources, Inc. are planning to develop an electric generation facility in Los Angeles County, California. The Baldwin Energy Facility No. 1 will consist of two 26.5 MW simple-cycle, gas-fired turbine generators with a combined nominal capacity of 53 MW. The facility will be located within the Inglewood Oilfield owned by Stocker Resources, Inc., at 5640 S. Fairfax Avenue in Los Angeles County, California.

We plan to begin construction as soon as permits are received. We will soon submit our application to the California Energy Commission. One requirement of the application process is to notify any interested Native American communities in proximity to the proposed facility.

Please provide us with an appropriate notification list at your earliest convenience. Thank you very much for your cooperation and attention to this matter. Please contact me at (323) 298-2223 if you have any questions regarding this request.

Sincerely,

Steve Rusch
Manager of Governmental Affairs
